

**University of Pavia**

**Ph.D. School of Electrical and Electronics Engineering and Computer Science**

## **The data transmission network of the University of Pavia: Structure and management**

**Claudia Venturini - Mariagrazia Tambani**

**Area Sistemi Informativi – Università di Pavia**

**25 March 2015, h. 11:00**

Aula E4 – Dipartimento di Ingegneria Industriale e dell'Informazione - via Ferrata, 5 Pavia

### **Abstract**

The seminar presents the implementation of the data network of the University of Pavia with particular attention to its basics expressed by the structured cabling. It then introduces a description of the active equipment types, from the point of view of the hardware features and their functionalities. The seminar also focuses on the issue of infrastructure management and end user assistance. The final part will be dedicated to a brief description of the wireless network.

### **Biographies**

**Claudia Venturini** graduated in Mathematics at the University of Pavia in 1991. She taught at High Level School and from 1993 she works at the University of Pavia in the office management networks. Since 1999 she has been APM of the GARR pole of the University of Pavia.

**Mariagrazia Tambani** graduated in Electronic Engineering at the University of Pavia in 1996. Until 2002 she worked as software systems engineer at Digital Equipment, Compaq Computer and HP. Since 2002 she works at the University of Pavia in the office management networks.

### **Organizer**

**Prof. M. Calzarossa**

### **Ph.D. Coordinator**

**Prof P. Di Barba**
