

Short CV of Luisa Donatella Marini

Academic career

Graduated in Mathematics at the University of Pavia in 1970.

Researcher of C.N.R. at the Istituto di Analisi Numerica in Pavia (now IMATI-CNR) from April 1, 1973 to October 31, 1990.

Professor of Numerical Analysis at the University of Genova from November 1, 1990 to October 31, 1993, and then at the University of Pavia since November 1, 1993.

Journals

- Associate editor of SISSC (SIAM Journal on Scientific and Statistical Computing) for two terms, from January 1988 to December 1993.
- Associate editor of CMAME (Computer methods in Applied Mechanics and Engineering) since 2001.
- Associate editor of Italian Journal of Pure and Applied Mathematics since 2008.
- Member of the Advisory Board of CAMES (Computer Assisted Methods in Engineering and Sciences) since 2014.
- Associate editor of IMA Journal of Numerical Analysis since 2017.

Various scientific activities and recognitions (last years)

- Recipient of the “Kirk Distinguished Visiting Fellowship” for the GCS programme at Isaac Newton Institute (Cambridge, UK), July-December 2019.
- Member (corresponding) of the *Istituto Lombardo, Accademia di Scienze e Lettere*, 2019.
- Member of the scientific committee of the 20th International Conference on Finite Elements in Flow Problems (FEF 2019), Chicago, March 29-April 4, 2019.
- Director of the school “Numerical methods for Pde’s”, IESC, Cargese, September 5-9, 2016.

- Representative of SIMAI (The Italian Society of Applied and Industrial Mathematics) in the General Assembly and Managing Board of the European Community on Computational Methods in Applied Sciences (ECCOMAS) since 2014.
- Chair of the committee for the ICIAM (The International Council for Industrial and Applied Mathematics) 2015 Collatz prize.
- She delivered the inaugural lecture for the opening of the academic year 2012-2013 at the University of Pavia.
- Elected member of the European Academy of Science (EURASC) since 2010.
- Member of the Committee for PhD programs at the University of Pavia since 1999, and then Director of the Doctoral School of “Scienze e Tecnologie A. Volta” of the University of Pavia from 2009 to 2013.
- Member of the Scientific Council of INdAM-GNCS from January 2005 to December 2008, and then again from June 2013 to September 2017.
- Member of the scientific committee of the Division of Mathematics of EURASC (March 2018-March 2021)

Invited (recent) lectures

- Kirk Lecture, Cambridge (UK), October 21st, 2019.
- The future of structure-preserving algorithms, ICMS, Edinburgh, 14-18 October 2019.
- Montpellier Colloquium, September 24, 2019.
- POEMS (POLYtopal Element Methods in Mathematics and Engineering), CIRM Marseille, April 29-May 3, 2019.
- GIMC XXII, Ferrara, 13-14 September, 2018.
- Workshop “Interplay of geometric processing, modelling, and adaptivity in Galerkin methods”, July 16-20, 2018 Vienna.
- Contemporary Applied Mathematics, Conference in honour of Philippe G. Ciarlet 80th birthday, Fudan University, Shanghai, May 7-11, 2018.
- Advances in Computational Fluid-Structure Interactions and Flow Simulation (AFSI 2019), Banff, May 2-4, 2018.

- Recent Advances and Challenges in Discontinuous Galerkin Methods and related approaches, conference in honor of Bernardo Cockburn 60th birthday, University of Minnesota, Minneapolis, June 29-July 1, 2017.
- 19th International Conference on Finite Elements in Flow Problems (FEF2017), Rome, 5-7 April, 2017.
- Topics in Applied Nonlinear Analysis: Recent Advances and New Trend, conference in honor of David Kinderlehrer's 75th birthday, Carnegie Mellon University, July 18-20, 2016.
- MAFELAP 2016, Brunel University, 14-17 June, 2016.
- ECCOMAS 2016 Conference, Crete island, 5-10 June, 2016.
- Non-linear Partial Differential Equations: theories, numerics and applications, conference in honor of Peter Markowich 60th birthday, Hong Kong, May 20-23, 2016.
- Computational Reduction Strategies in Fluid Mechanics and Fluid-Structure Interactions, SISSA, Trieste, 13-14 July, 2015.
- Advances in Computational Fluid-Structure Interactions and Flow Simulation (AFSI 2015), Istanbul, May 11-13, 2015.
- 18th International Conference on Finite Elements in Flow Problems (FEF2015), Taipei, 16-18 March, 2015.
- Structure-Preserving Discretizations of Partial Differential Equations, a conference in honor of Doug Arnold 60th birthday, Minneapolis, October 22-24, 2014.
- Structure-preserving and Polyhedral Discretizations, WCCM XI, Barcelona, 20-25 July 2014.
- Robust Discretization and Fast Solvers for Computable Multi-Physics Models, ICERM, Brown University, Providence, May 12-16, 2014.
- Advances in Computational Fluid-Structure Interaction and Flow Simulation, a conference in honour of Tayfun Tezduyar, Tokyo, March 19-21, 2014.
- TH70- a conference in honor of Tom Hughes, San Diego, 24-28 February 2013.

- Discretization Methods on Polygonal and Polyhedral Meshes, Milano, September 17-19, 2012.
- Barrett Lectures “Recent developments in Discontinuous Galerkin Methods”, Knoxville, May 9-11, 2012.
- ICIAM 2011, Vancouver, July 18-22, 2011.
- Int. Conference Discontinuous Galerkin Methods for Pde’s, Heraklion, September 26-28, 2011.
- Int. Conference “Frontiers of Computational and Applied Mathematics”, Beijing, October 21-25, 2011.
- Penn State University, April 2010.
- School on Discontinuous Galerkin methods, Dobbiaco, June 21-25, 2010.

Scientific activity

My scientific production consists of about 100 scientific papers, most of them in international journals, mainly on Numerical Methods for Partial Differential Equations. My field of interest is, generally speaking, the analysis of numerical schemes for the solution of elliptic partial differential equations (of second and fourth order) by means of different kinds of finite element methods: conforming, non-conforming, hybrid, mixed, and equilibrium. More specifically, I applied finite element techniques for the treatment of problems coming from various applications: semiconductor device simulation, electromagnetism, fluid-dynamics, structural mechanics. Particular emphasis was given to the approximation of non-coercive problems, which lead to develop various techniques for stabilizing Galerkin formulations, for applications to domain decomposition methods with non-matching grids, and to advection dominated problems. In the last decade I was particularly interested in developing and analyzing schemes based on Discontinuous Galerkin methods, for the discretization of various applied problems, such as Darcy flows, advection-diffusion problems, and Reissner-Mindlin model for plate problems. The more recent production is devoted to a new technique, the Virtual Element Method, for the discretization of Pde’s with applications. Below the list of the latest publications. For a complete list I refer to my webpage: <http://arturo.imati.cnr.it/marini>

List of publications (last years)

1. *The MITC9 shell element in plate bending: mathematical analysis of a simplified case*, Comput. Mech. **47**, 2011, 617-626 (with K.-J. Bathe, F. Brezzi) (with F. Brezzi, J.A. Evans, T.J.R. Hughes)
2. *New rectangular plate elements based on twist-Kirchhoff theory*, Comput. Methods Appl. Mech. Engrg. **200(33-36)**, 2011, 2547-2561 (with F. Brezzi, T.J.R. Hughes)
3. *L2-estimates for the DG IIPG-0 scheme*, Numerical Methods for Partial Differential equations, (online: 15 JUN 2011) **28(5)**, 2012, 1440-1465 (with B. Ayuso de Dios, F. Brezzi, Oto Havle)
4. *Basic principles of Virtual Element Methods*, Math. Models Methods. Appl. Sci. **23(1)**, 2013, 199-214 (with L. Beirão da Veiga, F. Brezzi, A. Cangiani, G. Manzini, A. Russo) **ISI Highly cited paper**
5. *Virtual Elements for linear elasticity problems*, SIAM J. Numer. Anal. **51(2)**, 2013, 794-812 (with L. Beirão da Veiga, F. Brezzi) **ISI Highly cited paper**
6. *Virtual Element Method for plate bending problems*, Comput. Methods Appl. Mech. Engrg. (online: 27 Sept. 2012, DOI:10.1016), **253**, 2013, 455-462 (with F. Brezzi) **ISI Highly cited paper**
7. *Equivalent projectors for Virtual Element Methods*, Comput. Math. Appl. **66(3)**, 2013, 376-391 (with B. Ahmad, A. Alsaedi, F. Brezzi, A. Russo) **ISI Highly cited paper**
8. *A Simple Preconditioner for a Discontinuous Galerkin Method for the Stokes Problem*, J. Sci. Comput. **58(3)**, 2014, 517-547 (with B. Ayuso de Dios, F. Brezzi, J. Shu, L. Zikatanov)
9. *Basic principles of mixed Virtual Element Methods*, ESAIM: Math. Mod. Numer. Anal. **48(4)**, 2014, 1227-1240 (with F. Brezzi, R.S. Falk) **ISI Highly cited paper**
10. *The Hitchhiker's Guide to the Virtual Element Method*, Math. Models Methods. Appl. Sci. **24(8)**, 2014, 1541-157 (with L. Beirão da Veiga, F. Brezzi, A. Russo) **ISI Highly cited paper**
11. *A quick tutorial on DG methods for elliptic problems*, in The IMA Volumes in Mathematics and its Applications 157, 2014, 1-24 (with F. Brezzi)

12. *Virtual Element and Discontinuous Galerkin Methods*, in The IMA Volumes in Mathematics and its Applications 157, 2014, 209-221 (with F. Brezzi)
13. *Virtual Element implementation for general elliptic equations*, in Building Bridges: Connections and Challenges in Modern Approaches to Numerical Partial Differential Equations, LNCSE 114, Springer, 2016, 39-71 (with L. Beiro da Veiga, F. Brezzi, A. Russo)
14. *Serendipity Nodal VEM spaces*, Computers and Fluids **141**, 2016, 2-12 (with L. Beirão da Veiga, F. Brezzi, A. Russo)
15. *Virtual Element Methods for fourth order problems: L_2 estimates*, Comput. Math. Appl. **72(8)**, 2016, 1959-1967 (with C. Chinosi)
16. *$H(\text{div})$ and $H(\text{curl})$ -conforming VEM*, Numer. Math. **133(2)**, 2016, 303-332 (with L. Beirão da Veiga, F. Brezzi, A. Russo) **ISI Highly cited paper**
17. *Mixed Virtual Element Methods for general second order elliptic problems on polygonal meshes*, ESAIM: M2AN **50(3)**, 2016, 727-747 (with L. Beirão da Veiga, F. Brezzi, A. Russo) **ISI Highly cited paper**
18. *Virtual Element Methods for general second order elliptic problems on polygonal meshes*, Math. Models Methods. Appl. Sci. **26(4)**, 2016, 729-750 (with L. Beirão da Veiga, F. Brezzi, A. Russo) **ISI Highly cited paper**
19. *Serendipity Face and Edge VEM spaces*, Rendiconti Lincei - Matematica e Applicazioni **28**, 2017, 143-180 (with L. Beirão da Veiga, F. Brezzi, A. Russo)
20. *Virtual Element approximation of 2D magnetostatic problems*, Comput. Methods Appl. Mech. Engrg. **327**, 2017, 173-195 (with L. Beirão da Veiga, F. Brezzi, F. Dassi, A. Russo)
21. *Serendipity Virtual Elements for General Elliptic Equations in Three Dimensions*, Chin. Ann. Math. Ser. B **39(2)**, 2018, 315-334 (with L. Beirão da Veiga, F. Brezzi, F. Dassi, A. Russo)
22. *Lowest order Virtual Element approximation of magnetostatic problems*, Comput. Methods Appl. Mech. Engrg. **332**, 2018, 343-362 (with L. Beirão da Veiga, F. Brezzi, F. Dassi, A. Russo)

23. *A Family of Three-Dimensional Virtual Elements with Applications to Magnetostatics*, SIAM J. Numer. Anal. **56**, 2018, 2940-2962 (with L. Beirão da Veiga, F. Brezzi, F. Dassi, A. Russo)
24. *Virtual Element approximations of the Vector Potential Formulation of Magnetostatic problems*, SMAI-Journal of computational mathematics **4**, 2018, 399-416 (with L. Beirão da Veiga, F. Brezzi, A. Russo)
25. *Polynomial preserving virtual elements with curved edges*, Math. Models Methods. Appl. Sci. **30(8)**, 2020, 1555-1590 (with L. Beirão da Veiga, F. Brezzi, A. Russo)
